

Mark Twain PTSA presents:

# Math Club

**Mondays, 3:05-4:05 / Oct 10<sup>th</sup> thru Dec 12<sup>th</sup>**

**Imagine if...**the only time a child was encouraged to read was during the 45 minutes of reading class time in school. Would he be a strong reader? Would she be a lover of books by the time she reached high school?

**Imagine if...**the only time a child was encouraged to do math was during math class time in school. Would he really love and understand math by the time he reached high school? Would she ever imagine a career associated with math, such as engineering, architecture or financial analysis?

Math Club is facilitated by certificated teachers who follow the Explorations in Math program to show students how math is relevant to their lives. The goal is to make math fun! This fall, both age groups will cover Problem Solving.

### **Exploring Problem Solving (Grades 3-5):**

To help them find the answers to numerous challenges, students will work together using a variety of problem solving techniques such as working backwards, finding hidden problems and/or creating a picture or graph. Students will also learn how to ask good questions when gathering information, and how to work as a group to solve problems.

The cost for Math Club is \$40 for one 10-week session. Please make checks payable to "Mark Twain PTSA". Space is limited and will be assigned on a first come, first served basis. The maximum number of students is 20 for grades 3-5. Classroom locations will be sent upon registration.
