

Mark Twain PTSA presents:

Math Club

Mondays, 3:05-4:05 / Jan 7th thru March 18th

Math Club does not meet on non-school days: Jan 21, Feb 18

Imagine if...the only time a child was encouraged to read was during the 45 minutes of reading class time in school. Would he be a strong reader? Would she be a lover of books by the time she reached high school?

Imagine if...the only time a child was encouraged to do math was during math class time in school. Would he really love and understand math by the time he reached high school? Would she ever imagine a career associated with math, such as engineering, architecture or financial analysis?

Math Club is facilitated by Twain teachers who follow the Zeno Math program to show students how math is relevant to their lives. The goal is to make math fun! This fall, both age groups will cover Geometry.

Discovering Geometry (Grades 1-2) meet in Ms. Runyon's classroom:

Discovering Geometry Mathematicians learn shape recognition and the properties of polygons. Students become familiar with shapes through activities that relate them to the natural world, through constellations, and the real world, through everyday signage. Further discovery using art and the alphabet is performed to explore the properties of symmetry.

Exploring Geometry (Grades 3-5) meet in Ms. Deabler-Urben's classroom:

Exploring Geometry Mathematicians learn shape recognition and the properties of polygons. Students explore the properties of circles, triangles, and quadrilaterals through various engaging activities such as constructing flying polygons using nothing but popsicle sticks.

The Math Club fee is \$50 for one 9-week session. Please make checks payable to "Mark Twain PTSA". Space is limited; students will be registered on a first come, first served basis.
